Need a Photometric Analysis for Your Lighting project?

A photometric analysis creates a computer simulation of a particular project. No matter what you are lighting, a photometric analysis is an easy way to quantify light levels before purchasing. When a report is generated, a lighting specialist will walk you through it so you know exactly what you will be receiving. Photometrics include average and minimum footcandles, uniformity ratios, spacing, light trespass info, and more. Plus, the cost of the study is refunded back to you when you purchase the fixtures. Call us at 800-468-9925 for more information about ordering a photometric analysis for your project.

Ready to Order the ARTO 57w FWC Certified Garage and Canopy Light 120-277v or Speak to a Lighting Specialist?

If you need some additional information about this fixture, give us a call at

800-468-9925. Of course, you can place your order online, right here, but our team is available to answer any questions that may come up. If your project requires multiple fixtures, ask us about quantity discounts. We are here to provide anything you need to purchase fixtures and illuminate your project with confidence.
