Need a Photometric Analysis for Your Project?

A photometric analysis creates a computer simulation of a particular project. No matter what you are lighting, a photometric analysis is an easy way to quantify light levels before making a purchase. When a report is generated, a lighting specialist will walk you through it, page by page, so you know exactly what you will be receiving. Photometrics include average footcandles, minimum foot candles, uniformity ratios, fixture spacing, light trespass info, and more, plus, the cost of the study is refunded back to you when you purchase the fixture. Call us at 800-468-9925 for more information about ordering a photometric analysis for your project.
