## ALUMINUM SQUARE LIGHT POLES WITH SOFT CORNERS

POLE SHAFT - The soft corner pole shaft is extruded from seamless alloy aluminum. On Tenon Mount poles, tenon is 2-3/8" 0.D. x 4" tall high-strength pipe. Aluminum straight poles are $4 ", 5 "$ and $6 "$ square.
HAND-HOLE - On 4" square poles, standard hand hole is 2" x 4" located 12 " up from bottom of base plate. On 5" square poles, standard hand hole is 2 " x 4 " located 14 " up from bottom of base plate. On 6 " square poles, standard hand hole is $2-5 / 8 " \times 5$ " located 18 " up from bottom of base plate. Hand hole gasket is provided. Optional festoon for GFI receptacle (with or without GFI Kit supplied) is available. Minimum height for location of festoon is $18^{\prime \prime}$ above standard hand hole.

BASE - Pole base is cast from 356 alloy aluminum. Completed assembly is heat-treated to a T6 temper. Tamper-resistant aluminum nut cover discs are included with anchor base.
BASE COVERS - Tamper-resistant aluminum nut cover discs are included with anchor base. Optional two-piece square cast base covers available. Must be ordered separately.
ANCHOR BOLTS - Set of four anchor bolts conform to ASTM F1554 Grade 55. Each bolt is provided with two hex nuts and two flat washers. Bolts have an "L" bend on one end and are galvanized a minimum of 12 " on the threaded end.
GROUND LUG - Ground lug is standard.
GROUND FAULT CIRCUIT INTERRUPTER - Ground fault circuit interrupter kit is optional. Pole Preparation (festoon) with GFI Kit must be ordered. Specify location in feet above base of pole and side orientation. Minimum height for location of festoon is 18 " above standard hand hole.

FINISHES - Baked-on polyester-powder finish provides one year limited warranty.
DETERMINING THE LUMINAIRE/POLE COMBINATION FOR YOUR APPLICATION:

- Select luminaire from luminaire ordering information
- Select bracket configuration if required
- Determine EPA value from luminaire/bracket EPA chart
- Select pole height
- Select MPH to match wind speed in the application area (See windspeed map).
- Confirm pole EPA equal to or exceeding value from note above
- Confirm total luminaire/bracket weight does not exceed maximum weight shown in chart below
- Consult factory for special wind load requirements

EPA based on commercial criteria. For applications in Canada and areas using code requirements other than commercial criteria, consult factory. Designs are limited to top-mounted and side-mount luminaires. Variations from sizes above are available, consult factory. Satisfactory performance of poles is dependent upon the pole being properly attached to a supporting foundation of adequate design.
Refer to EPA information on next page. Maximum luminaire/bracket weight is shown on the above chart.
1- Maximum weight of fixtures/brackets to be mounted to pole.
2 - Structure weight is a nominal value which includes the pole shaft and base plate.

## FOOTNOTES:

1 - See Area Lighting Brackets - Bolt-on and XAS3/XAMU Area Lighting Brackets pages for Internal Slip-fitter brackets. 2 - Pole heights will have +/- 2" tolerance.
3 - Pole includes factory installed vibration damper.

4- TN120 ${ }^{\circ}$ mounting configuration not available.
5 - Specify location in feet above base of pole and side orientation. Minimum height is 18 " up from standard hand hole.
